Condition: New. Publisher/Verlag: Springer, Berlin | Industrial and Research Applications | This book covers computer aided design (CAD), 3-D modeling and engineering analysis and ways they can be applied in research and industry including aerospace, defense, automotive and consumer products. Includes green energy and novel manufacturing techniques. | This succinct book focuses on computer aided design (CAD), 3-D modeling, and engineering analysis and the ways they can be applied effectively in research and industrial sectors including aerospace, defense, automotive, and consumer products. These efficient tools, deployed for R&D in the laboratory and the field, perform efficiently three-dimensional modeling of finished products, render complex geometrical product designs, facilitate structural analysis and optimal product design, produce graphic and engineering drawings, and generate production documentation. Written with an eye toward green energy installations and novel manufacturing facilities, this concise volume enables scientific researchers and engineering professionals to learn design techniques, control existing and complex issues, proficiently use CAD tools, visualize technical fundamentals, and gain analytic and technical skills. This book also: Equips practitioners and researchers to handle powerful tools for engineering design and analysis using many detailed illustrations Emphasizes important engineering design principles in introducing readers to a range of techniques Includes tutorials providing readers with appropriate scaffolding to accelerate their learning process Adopts a product development, cost-consideration perspective through the book's many examples | Preface.- Introduction.- Methodology of Computer Aided Design, 3-D Modeling, Engineering Analysis, and Prototyping Experiment.- Design and Development of New Solar (Green Energy) Water Distillation Energy System.- Design and Development of New Wind Power Energy (Sustainable Energy) System.- Design and Development of New Biomedical Instrument.- Design and Development of New Automated and High Speed Production System.- Design and Development of New Robotic System.- Design and Development of New Energy-Saving Cooling System.- Design and Development of New Magnetic Sealing System.- Additional...
